Status	Finished
Started	Monday, 19 October 2026, 9:48 PM
Completed	Monday, 19 October 2026, 9:52 PM
Duration	4 mins 50 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

a. Heap Sort
b. Merge Sort
c. Quick Sort
d. Bubble Sort

The correct answer is: Bubble Sort

Question **2**

Complete

Mark 1.00 out of 1.00

Which algorithm typically follows a divide-and-conquer structure?

a. Linear Search
b. Merge Sort
c. Binary Search
d. Bubble Sort

The correct answer is: Merge Sort

Question **3**

Complete

Mark 1.00 out of 1.00

Which of the following best describes the term "sorting" in computer science?

a. Merging two datasets
b. Removing duplicates from a list
c. Finding a specific element in a list
d. Arranging data in a specific order

The correct answer is: Arranging data in a specific order

Question **4**

Complete

Mark 1.00 out of 1.00

The process of placing or rearranging a collection of elements into a particular order is known as

a. Merging
b. Searching
c. Sorting
d. Rearranging

The correct answer is: Sorting

Question **5**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is described as making multiple passes through a list, comparing elements, and swapping adjacent items that are out of order?

a. Merge Sort
b. Quick Sort
c. Insertion Sort
d. Bubble Sort

The correct answer is: Bubble Sort

Question **6**

Complete

Mark 1.00 out of 1.00

What is one of the key advantages of using the built-in sorted() function in Python?

a. It requires external libraries
b. It is less efficient than custom sorting algorithms
c. It sorts data out of the box efficiently
d. It only works with integer arrays

The correct answer is: It sorts data out of the box efficiently

Question **7**

Complete

Mark 1.00 out of 1.00

_____ explain how an algorithm will perform when the input grows larger.

a. Merging
b. Searching
c. Sorting
d. Complexity

The correct answer is:
Complexity

Question **8**

Complete

Mark 1.00 out of 1.00

What does the Bubble Sort algorithm primarily focus on during each pass?

a. Bubbling up the largest element to its correct position
b. Sorting the entire list in one pass
c. Bubbling up the smallest element
d. Dividing the list into halves

The correct answer is: Bubbling up the largest element to its correct position

Question **9**

Complete

Mark 1.00 out of 1.00

Which of the following best describes the process of Merge Sort?

a. It repeatedly finds the minimum element and moves it to the sorted part of the list
b. It builds a sorted array one element at a time
c. It compares adjacent elements and swaps them if necessary
d. It divides the list into two halves, sorts each half, and then merges them

The correct answer is: It divides the list into two halves, sorts each half, and then merges them

Question **10**

Complete

Mark 1.00 out of 1.00

What is sorting in the context of computer science?

a. Inserting data into a list
b. Deleting data from a list
c. Searching for data in a list
d. Arranging data in a particular format

The correct answer is: Arranging data in a particular format

Question **11**

Complete

Mark 1.00 out of 1.00

Algorithm design technique used in merge sort algorithm is

a. Backtracking
b. Dynamic programming
c. Divide and conquer
d. Greedy method

The correct answer is:
Divide and conquer

Question **12**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

a. Quick sort

b. Heap sort
c. Bubble sort
d. Insertion sort

The correct answer is:
Insertion sort

Question **13**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is based on repeatedly dividing the list into halves?

- a. Merge Sort
- b. Bubble Sort
- c. Insertion Sort
- d. Quick Sort

The correct answer is: Merge Sort

Question **14**

Complete

Mark 1.00 out of 1.00

What is a significant characteristic of Bubble Sort?

- a. It recursively sorts subproblems
- b. It uses the heap data structure
- c. It divides the list into sublists
- d. It bubbles up the largest element in each pass

The correct answer is: It bubbles up the largest element in each pass

Question **15**

Complete

Mark 1.00 out of 1.00

What is Bubble Sort known for?

- a. Being the most efficient sorting algorithm
- b. Bubbling up the largest element to its correct position with each pass
- c. Sorting data in a non-sequential manner
- d. Using the divide-and-conquer approach

The correct answer is: Bubbling up the largest element to its correct position with each pass
